Starting handle similar to MGA

Written by Peter S30 at Oct 20, 2008 7:25 am

I was searching for a starting handle for the DB3l. And by chance found that the one from an MGA fits ! (if it was only a bit shorter it would no longer fit and it may be that not every car is built precisely the same)

The advantage: you can order the MGA starting handles from many dealers.
