

## Lagondaforum: V12 cam cover finish

### V12 cam cover finish

*Written by Gavin Bain at Sep 24, 2016 6:14 am*

I would like confirmation of the original finish on the cam covers of a 1938 V12 engine please

Brian, I believe polished alloy was the finish of most cam covers. Some were done in black enamel, possibly at the buyer's request.

I base this opinion on having lived for about sixty years with eight V12s.

Mark.
