

## Lagondaforum: Any Kent members

### Any Kent members

*Written by Bazza at Aug 04, 2017 7:42 am*

Hi

I am looking for a members in the Kent area that I can make contact with. I am currently rebuilding the steering box on a vintage 1 ton dumper and the box is a Bishop cam as used in the Lagonda. The bearing that I need are only available to club members through Robin and due to insurance are not available to non club members. He has suggested that I try to find a club member to purchase them for me.

If live anywhere near Ashford and are willing to help please get in touch.

Dear Bazza,

The scroll cam the club offer is currently undergoing a very comprehensive design and manufacturing design check. It's a complex helical scroll and the peg that engages with it carries enormous load on these heavy cars. play in the peg shaft also affects the contact point with the scroll so you would be advised to check this as well. It could be some time before they have stocks.

Good luck in your quest.

David
