M45 tail lights 1934 BUICK????????

Written by bruffsup at Aug 09, 2011 4:07 pm

I read in Davy's book that the M45 used 34 Buick tail lamp stalks so unwittingly bought a set on Epay! They are not only longer and wrong base angle than the one original? but also made of cheap "pot metal" .

I think that quotation came from Arnold Davey,s book on the 4.5lt and V12. He did say the lights were from a Buick but also stated they were made from Mazak (pot metel)(page 45)
