searching 3/3.5 litre exhaust manifolds

Written by bgriffin at Jan 14, 2008 10:01 pm

Restoring my 3.5 litre I have one exhaust manifold pretty well beyond further repair (cracks) and the other possibly serviceable. My only solution seems to be a remanufacture (casting) of a pair. Any alternative suggestions, spares available or owners interested in participating in the remanufacture would be welcomed.
