Lagondaforum: Rubber seals/profiles

Rubber seals/profiles

Written by Klaus.Klement at Oct 29, 2014 9:35 am

During the process of restoring some V12 DHC we experienced a lack of availability of different rubber seals. For example the lip-seal for the front window and the rubber seal of the triangle windows and the door seal.

I am planning to order tools for those seals. If someone is interested in this seals, please send your message to Klaus.Klement@cytec.de

Klaus,

Have you checked out some of the UK suppliers who specialise in rubber mouldings? A few years ago I took a piece of my original windscreen frame rubber (V12 dhc) to an autojumble, and found 3 that were very close to the profile of the original.
