Lagondaforum: 2 Litre Instruction Book

2 Litre Instruction Book

Written by Tim Wadsworth at Feb 16, 2016 10:41 pm

During the 57 years I have had my 2 Litre I have made a number of modifications to the car, information about which I would like to pass on to the next owner. I have therefore made a digital copy of the original Instruction Book, preserving all the old text, drawings and pictures but adding in this extra information. I would be very happy to give a copy of this, on CD, to any 2 litre owner who would like it. They can then edit out my additions (in red), add any additional information they wish and print out a unique comprehensive instruction book specific to their own car in the style of the original. Any takers ?

Tim, I have followed with interest your occasional articles in the club magazine and have a high regard for the thought you have applied to the things you have done to your car. I would be delighted to have such a record of all those changes/improvements.

My e-mail address is rodamos@melbpc.org.au

Hi Tim, would I be correct in assuming much of this information is also pertinent to the 16/80? If so I would be interested in receiving a CD.

Thanks - Rich...

Tim, I recently acquired a 14/60 HC Tourer, and would be extremely grateful to receive a copy of your CD.

Many thanks

My sincere apologies to members who have asked me for a CD of the 2 litre Instruction book. I haven't been active on the forum for some time and have missed your messages. Please send me your postal address to tim@lagondahire.co.uk and I will send a.s.a.p.

The book is too big to send as an e-mail. When you get it you will need a copy of Microsoft Office Publisher 2003 to read it. If you don't have it you can get it off the net as a free download.

Hi Tim,

I hope you are still active and covid19 free. I am in the process of finishing the restoration of my family 14/60 and would appreciate a copy of your book too.

Thanks
