

Lagondaforum: 4.5 Head gaskets

4.5 Head gaskets

Written by Julian at Apr 04, 2016 9:27 am

Hi all,

Just a quick word to mention that we are proceeding with our plans to give a wide range of up quality spares for the Lagonda range, (wait for some interesting news soon) and this is starting with a new batch of competition cylinder head gaskets for the 4.5 litre '6'

Made in modern composite graphite with steel sealing rings and large enough bores to cope with a 3.54" bore without overhang.

Very strong and tested thoroughly by one of my heaviest footed and furthest driving rally customer's

Priced at about 210 Euros each so quite a reduction compared to the gaskets available in the past.

Hope we can bring you all the service you deserve.

Best regards Julian
