Please post real names of car owners, phone numbers, addresses only if you know the person concerned agrees to that !

Examples: lists of participants of a rally must not be published, a list of owners of a certain type of car (e.g. taken from rally organisation or from the members list of the Lagonda Club) must not be published on the internet. Of course you can recommend professionals (because you can assume they want publicity) or you can give personal information of single persons in case you have checked with them that they agree.
