

Lagondaforum: Fan belt

Fan belt

Written by Bill LG45 at Sep 30, 2016 8:24 am

My car had the wrong belt fitted, so I have just been through the process of finding the correct fan belt for my Sanction 3 LG45 and thought it worth recording the reference number to save others the time and trouble: B(X) 31. X denotes "cogged" and is more flexible /fits better around the smaller pulley than the plain B31.

Regards to all

Bill

That's interesting Bill. I hadn't thought to use the cogged belt. Mine seems to work fine but I know that if not used they can get a bit tougher and less flexible so guess the cogged option is a good one.
