

## Lagondaforum: Ignition switch

### Ignition switch

*Written by peter weir at Oct 12, 2016 10:12 pm*

Some while ago I remember a post re converting a Lucas lighting switch to a ignition switch. I'm still searching for one for my rebuilt M45 with an LG6 engine which will read OFF 1,2,1&2.

I remember that a member has the knowledge and skill, but can't find the details now. Can anyone remember?

Dear Peter,

you can search the whole forum with the "Search" function in the top (magnifying glass symbol). Searching for "switch" finds it. In case you have too many results you can refine the search by searching only the headers and not the whole posts and you can search for "either" or "and"

I think you are looking for this one <http://lagondaforum.com/showtopic.php?id=874&q=ignition+switch>

Yes, Richard Jones is the person you want. I dont think anyone else does this conversion unless anyone knows otherwise ...

Dear Peter and Bill

This is the one.

Thanks for the advice on searching.

I'll contact Richard and see if he can modify one for me.

Kind regards

Peter
