DVXH6A is the base unit with part numbers 40125E or F. These denote model year as 1956 or 1957.

This is a standard AM DB2/4 dizzy, very easy to obtain. best to hunt a little to get a good price and of course a flame thrower.

If you look back through the posts on 2.6/3.0 litre cars, I think your Portugal car has been mentioned before some years ago.
