Lagondaforum: V12 items wanted

V12 items wanted

Written by Charlie at Apr 17, 2018 7:44 pm

Handbook for 1940 V12

NS front brake back plate. Damage to bottom due to wheel loss not a problem.

Lower sump casting.

Oil pick up filter and pipe work for sump

Headlight glass for R100 light (not P100) LUCAS part no 506508

Thanks

Charles

Charlie, I have a Celeron idler gear that appears to have never been used.

Also lots of other V12 spares, unfortunately none itemised above.

Mark

Charlie

Try Ralph Dukes for the headlamp glass - 01777 705130. He often has "unobtainable" bits although will be expensive. If he does not have anything he may be able to guide you to someone. Usually very helpful. No connection with him except as a (now impoverished) customer !

Please look on the Club Spares list on the web-site, they have a key item you are looking for:

Lower sump casting (ENGV02)

Also worth giving them a call about your other items, very helpful people and super quick posting.

The V12 owners manual come up from time to time on eBay

Perhaps an advert in Club Monthly Gazette might flush out some more parts and it is free

Simon

Thanks for the replies. I know Ralph, I will try him.

Kind regards

Charles
