Scintilla Vertex instructions, parts list etc

I have a prewar original Scintilla pamphlet "Instructions for Fitting and Maintenance", plus a quite different reprint of a 1947 version of the same, plus a Scintilla Parts List reprint of a 1942 original. The latter two I bought from our Club in the late 1990s, and I note are no longer available. I did offer these at last year's Annual Gathering, but no takers (I forgot to display them in the Spares Tent until later on!), so they are now on ebay. If interested, just search "Scintilla Vertex" to find all three items. Do note these are all specifically for the Vertex type, I have no literature for any other model of Scintilla magneto.
