1932 Lagonda 3 liter - need a few parts.. engine assembly

Written by PeteAMR at Jul 15, 2019 11:43 pm

Hi - I have a 1932 Lagonda 3 liter. In the process of restoring and needing a few parts. So far (having pulled out of a barn in a totally disassembled state) ... appears I need a radiator and mountings (I have the shroud) and the RH rear alloy engine mount.

Hopefully some sort of assembly notes for the engine would be great. The previous owner disassembled it 12 years ago, left the block to be rebored at a local shop... thank (^) they never threw it out. The rest is in random box's.. fun... but painful

Any help here?

Thanks -

Pete

Hi Pete

I have sent you a PM about this.
