

Lagondaforum: AT instruments

AT instruments

Written by sroope at Sep 15, 2010 9:44 pm

Good evening

I am looking for some information about the 5" AT instruments used in the LG6 and V12. Would anybody be able to tell me the drive ratio of the 0-6000 rpm anticlockwise rev counter?

Is it 2:1 or possibly 4:1? Where is the cable's point of drive and is a reduction gearbox used.

Any help would be greatly appreciated

Many thanks

Simon
