Hi Peter,

Great work, looks like a thorough job, & hope it repays you with long term reliability.

Those numbers in your last pictures could be the casting date...this was often done with block & head castings. Unfortunately not clear enough in the pictures to make anything of them though.

Laurence

Well done, Peter. (I have just caught up with this thread after being in the Northern Hemisphere for a month).

It is good to have one more enthusiastic DB owner making such good, if slow progress. Alan Heard should be most satisfied.

Merry Christmas to you all: this is one December we are pleased to be in Australia!

Mark and Jim.
