**Mechanical Fuel Pump**

*Written by FRED at Jan 27, 2012 3:58 pm*

I bought a AC mechanical fuel pump mod ACX 10 (Canadian), that fits my 1931 3L. I think however the rocker arm is the wrong type as the pump does not work if fitted to the engine. The fork inside the house moves only 5 mm. I heard that a fuel pump, model A should be the right one..

Does anyone have drawings of or a spare rocker arm to be fitted to my pump?

Thanks for your assistance
