

## Lagondaforum: Blocks and Heads

### Blocks and Heads

*Written by Julian at Apr 04, 2012 12:19 pm*

As with the V12 Post, we at LMB are now putting into production Blocks and heads for the 2 litre Lagonda,

The blocks will be made with improvements to stop the usual cracking in the inlet and outlet ports and on the rear of the block and head. They will be made in improved materials and will fit all standard parts as well as our special 2.4 litre parts.

Anyone interested, please drop us a line.

Regards,

Julian
