Rapide cup

Written by randall977 at Sep 15, 2012 8:31 pm

Bored / inspired one day last week I thought I would make myself a cup for drinking tea while working on the car. There's a few on eBay at the mo but I'm not massively keen on the design.

The images are dealer who sold my car and a period advert...

Hi Christian,

Great post! I agree with you as regards the design, but since they are still quite unique I am still interested. Could you post the link to the ad on e-Bay?

Thanks!
