How many miles per gallon can I expect with my M45 ?

Written by bruffsup at Sep 20, 2012 11:52 pm

I see Colin mentioned in another posting 3 miles per litre for an LG6 ! Does anyone care to contribute to this seldom discussed but increasingly relevant topic (to me anyway) ? I am old school and still think in miles per gallon (Imperial) . The price of petrol just took another jump here in Canada. Now up to \$1.31 per litre regular. Hi test Shell without ethanol is \$1.50 per litre.

Generally about 20mpg driven on std roads at normal modern day speeds.
up to 30 if driven hard up the mountains!

Regards,

Julian

That sounds great Julian. Better than I thought. So if I drive it harder I will get 10 more miles per gallon or is that as I suspect a typo ?
