

Lagondaforum: 2.6 Windscreen Rubber

2.6 Windscreen Rubber

Written by reevsy at Feb 06, 2008 2:54 pm

Hi All I'm looking for a Good, small section of 2.6 windscreen rubber that shows a **GOOD** profile. I've had the Windscreen rubber for the 3 ltr made and have been requested about 2.6. I can have it made but need a template to enable an extruding tool to be made.

If you know that there is more than one profile? Let me know for which model

Peter 🤔

probably you know them, but in case not: Baines (www.coh-baines.co.uk) has many rubber profiles and also can make new ones

Hi Peter. I have a company that can produce the windscreen rubbers but I don't have a sample of rubber to send to them for the 2.6. If anybody can help that would be great! I don't need the rubber as I have a 3 ltr but I know its almost impossible to get any rubber for the 2.6 or the 3 ltr. If I get a sample and the company can make this profile I will have 30m made. I will sent the rubber to John Woodward to distribute. I have already had rubber made for the DB 3 ltr and John has this for those who may need it.

Peter
