### 1951/2 Lagonda 2.6 litre saloon with engine and parts in USA..

*Written by SRD at Nov 06, 2012 2:46 pm*

A 1950's 2.6 litre saloon with original engine and gearbox.

Engine number of LB6A/50/602, with original column change. Lots of the car missing, but nice to see the engine and transmission still there.

Also present are bumpers, four doors, windshields, the original radio and speaker along with a lot of small miscellaneous parts including a handle for the crank start, wheel covers. Also comes with a workshop and parts manual.

The motor turns over manually according to the seller.

Currently asking \$20K or an offer. Shame it is in the USA in Ohio, but no doubt people there who could use this :

So we add this car to the stripped 2.6 DHC in the adjacent thread and we have a car again!

Tony hi

I did contact the dealer who has this part car in the USA. He has a very inflated idea of its value, so it will be with him for a good while I think.

Simon
