Meadows 4.5 Litre engine parts for sale

Written by alistair at Dec 07, 2012 4:21 pm

A used 4.5 litre crankshaft, with full set of con rods with pistons. I have no idea of condition or specification - they just came in a box because they had been replaced on M45 that I had bought. Also have original clutch assembly. If you are interested send me a PM and I will do a photoshoot to provide more helpful information.
