

Lagondaforum: Boot lid stay

Boot lid stay

Written by Peter S30 at Nov 29, 2007 8:27 am

Hello !

I am looking for a second of these "trunk lid holders": I now learned you call them "boot lid stay" (see image), I only have one on the left side of my V12. Distance of one arm from joint to joint is 13cm distance of the other 23cm.

Or somebody knows where to get similar ones (then I would need 2)

Regards

Peter

Found one thanks to Alan Brown. Only missing part here is now a knurled screw for it, like you see it in the image. The thread is UNC 5/16 - 18TPI

Made 2 new ones (2010)
