Petrol pump problem - mechanic wanted

Written by andyking at Mar 26, 2013 11:09 am

I'm looking for a specialist mechanic in the South East willing to travel to the Croydon area for some minor engine work on a 2L tourer.

The car has been owned since the 1960s by my father, who restored the car then and has kept it in beautiful condition ever since. It's recently had new bearings and the engine has been mostly reconstructed, but we require a mechanic to check the timing and resolve problems with the petrol flow to get the engine fully working again.

Any offers or suggestions would be welcome.

Many thanks.

Andy
