

Lagondaforum: Are the pressed steel wheels from a Ford v8 pilot?

Are the pressed steel wheels from a Ford v8 pilot?

Written by opalshade at May 28, 2013 10:57 am

I would like to put larger wheels on my prototype LBX EX1

I am lead to believe that they are the same wheels as a Ford v8 pilot can any one confirm this and can any one point me in the right direction for 17 inch wheels instead of the standard 16 inch Ford must have made 17"?

I think the car would benefit from larger wheels What do you think?
