Lagondaforum: wanted parts for 2.6 dropheat 1949

wanted parts for 2.6 dropheat 1949

Written by garand69 at Jul 29, 2013 5:29 pm

hello

currently restoring a 2.6 dropheat in France

to complete the restoration of my Lagonda 2.6 I search the following parts

Cast Iron Exhaust Manifolds (Part No. 72247 Rear)

I'm looking for three motor mounting pads and Those for the front axle, a gear box, the rear axle and Those Who set body to the frame for Lagonda 2.6

I am also in. search of Mechanisms of raising and lowering door glass

I am buyer RETAINING door mechanism
if you have any other parts has sell for this car, I am interested
sent me by email photos and prices

I have replied to this email already.

However, the winding mechanisms can be used from a Rover P4 /90.

How much else is missing from your doors ?

The cast iron exhaust manifolds will also be at Aston Service Dorset, however, this is a common part for a DB2, so won't be cheap

I hope you have all the major items, since they are not easy to find.

Best of luck

Simon
