

Lagondaforum: Rapide Switch Gear

Rapide Switch Gear

Written by SRD at Dec 24, 2013 5:18 pm

Have just recently finished going through all the switches on my dash-board, I had a friend drop by in a "Farina family" car. He was very taken with the walnut dash and multiple dials.

However, he said that he recognised the source of the switch gear in the Rapide (and most probably also the DB4 ?).

A quick look in his charming 1962 Wolseley 6/110 car confirmed he was correct. A nice parts bin raid from the BMC Group.

Very nice interior! Well done on finding out where the switch gear is from.
