

Lagondaforum: lubrication system

lubrication system

Written by Pina at Mar 05, 2014 11:39 am

Dear forum members,

Is there a plan, schema available for the routing of the lubrications system of a LG45, specifically a rapide?

Any help greatly welcome.

Best regards

I have a diagram somewhere. I will dig it out. Not specific to a Rapide though.

I was going to direct you to the club website where they sell a "Revised Manual" but it doesn't seem to have the diagram.

David

Here is the diagram.

If you intend this to be a working system you should add a small tank of clean oil as a feed and blank off the supply from the sump which tends to block the pipes. There are also "drip plugs" to restrict the flow in various places.

David,

Thanks for that sheet. perfect info!

Best regards
