A very pretty and seemingly well restored 2.6 dhc in burgundy is now for sale in the USA at ca. £56k.

This car was unsold, and I suspect that the car dealer was acting as the agent for the owner.

It has recently appeared at auction in the USA on 31st August, but no idea if it sold yet ?

These cars i.m.o. seem to be hard to value or sell at auction, I think their dated lines, might make them tough sellers in the US market, given what came after them in terms of the 3.0 litre cars.

This car has now finally been sold and purchased by a Lagonda club member in the USA.
