High Chassis wiring diagrams

Written by Paul Seller at May 13, 2014 12:24 pm

I'm presently rewiring my 2 litre high chassis model. There was never much in the way of detailed wiring diagrams for this model and my car isn't helping by having a non-standard wiring set-up that has been heavily modified over the years. The cut-out is at the centre of the wiring universe on this model and I'd be grateful if anyone has gone to the trouble of creating a wiring diagram for the high chassis model which correctly portrays the layout of the terminals on the Smiths cut out in relation to the surrounding circuits?
