

Lagondaforum: Frequently asked questions

Frequently asked questions

Written by Peter S30 at Apr 15, 2008 1:59 pm

I registered but can not log in:

You must remember the username and password which you used.

New user activation: to keep spammers out of this forum I will receive a mail automatically if a new users wants to register. I will answer him and if he seems to be a true Lagonda enthusiast, I will activate his account. After this he can always just log in with username and password.

My account is not activated after several days:

Send me a mail as reminder (info@lagondaforum.com or peter.schirg@psprozesstechnik.ch)

I forgot my username and/or password:

click on „Forgot Password“, here you will be asked to the e-mail address from which you did your registration. To this address you will receive a new activation mail automatically

Forgot password function does not work:

send a mail to the moderator (me) info@lagondaforum.com or peter.schirg@psprozesstechnik.ch. I can not read your password, it is hidden and encrypted, but I can assign you a new password which you can change later.

I can not see the site correctly, I can not see photos:

reason is probably your browser, send a mail which browser you use (Internet Explorer, Opera, Netscape, Firefox.. and version number) or try another browser.
