

Lagondaforum: Front brakes, need of parts

Front brakes, need of parts

Written by DirkWegman at Jun 03, 2015 7:47 pm

Hello,

I have a question, i'am working on a Invicta Lowchassis S type at the moment, and there are a lot of parts missing. Especially the front brakes are worrying me.

I do have the front backplates, somebody told me they are the same as used on a Lagonda 2ltr...can somebody confirm?

What i'am looking for are the main control parts, for example the bar to go into the backplate and the mechanism inside. (Sorry for my english btw)

i have a link to my Flickr photo's. I hope you can see them.

[Front brakes pictures](#)

i really hope you can help me to find parts and or solutions.

Have you spoken to Rob Pollock - he is one of the main experts on the S type. Alternatively David Ayre who also knows Lagondas and Invictas ?

No,

because i'am new in this.

So do they have a internet adres or do you have any contact info: email adres..?

thanks.

br. Dirk

correction: David:i spoke and he had some parts. but not everything i need.
